Stele reaction [] re

improvement program - (2 edz) -

1) using present booster -> using larger

booster, and asking Hq for new proposal

Wanted to know if [] was supposed to put in a proposal. Maxey said first step to develop planning package and then get DNRO to verify planning assumptions, or modify, after which we go back for second time with specific system, at that point it is the proper time for an RFP. Of course there can be exchange of technical and system mod info in planning stage.

NRO review(s) completed.
